

Health Monitor GMON

„INDICATE health risks – RATE professionally – REACT prophylactically“

Register Questionnaire

With the GMON register questionnaire a special part of life of the patient can be scrutinised. For example:

- diet
- athleticism
- health

The screenshot shows a software window with a menu bar (Körpermaße, Körperwerte, Vitalwerte, Laborwerte, etc.) and a main content area with a questionnaire form. The form includes sections for 'FRAGEBOGEN', 'Angaben über Art und Menge des Tabak-Konsumes', 'Meine Trinkgewohnheiten', and 'Meine Essgewohnheiten - Art der Mahlzeiten'. Each section contains several dropdown menus and input fields for data entry.

This screenshot shows the same questionnaire form but with answers entered. The questions are: 'Do you eat vegetables, fruit and dark bread daily?' (yes), 'Do you have a high blood sugar diagnosis already?' (no), 'Do you have a minimum of 30 minutes physical movement at a stretch per day?' (yes), and 'Do any of your family members have diabetes?' (no). The total evaluation is shown as 25%. A 'RISK TREE' sidebar on the right shows a hierarchy of health risks.

The displayed questions are not your questions?!

Create your individual questionnaire in a few steps with this register!

You can create your questionnaire according to your imagination and topic.

By using a program for text editing (Editor, Word,...) you can define the following criteria:

- quantity (max. 4) and names of the register
- sub headlines for better structure
- maximum 30 questions
- maximum 24 pre-set answers per question

```

;maximum 4 pages (Page1..4, continuing)
;maximum 30 questions (L1..L30, continuing) with maximum 24 answers (A..Z)
;a question without an answer is a subheading
;the answers are saved in the database as string (AW1..4)
;ID: (0..9) is saved at the first position of the answer string
:NOANSWER: this choice appears as - in the answerstring
:OPTION: different possibilities to rate the answers:
:OPTION=SCORE: the average (in %) of all answers is shown and saved at the database (SC1..4)

[PAGE1]
HDR=Diabetes test
ID=0
NOANSWER=k. A.
OPTION=SCORE
L1=Do you eat vegetables, fruit and dark bread daily?|yes|no|n/a
L2=Do you have a high blood sugar diagnosis already?|yes|no|n/a
L3=Do you have a minimum of 30 minutes physical movement at a stretch per day?|yes|no|n/a
L4=Do any of your family members have diabetes?|yes|no|n/a

[PAGE2]
HDR=Heart-cycle
ID=0
NOANSWER=k. A.
OPTION=SCORE
L1=I am under medical treatment because of heart and cycle problems?|yes|no|n/a
L2=I take drugs because of heart and cycle problems?|yes|no|n/a
L3=Cholesterol lowering drugs?|yes|no|n/a
L4=Blood pressure lowering drugs?|yes|no|n/a
L5=I am a smoker?|yes|no|n/a

L13=My eating customs - type of meals
L14=Meat?|yes|no|n/a
L15=if yes, how much?|yes|no|n/a
    
```

A questionnaire model is easy to copy into the software by using an ini-data with text editing.

We would be glad to generate your questionnaire for you.

The screenshot shows a printed report header with the logo for 'Health Monitor Medizin & Service'. It includes patient information: 'Ernst Mustermann (male 58 Years)', 'Answers on 04.12.2013 at 11:34 clock', and the title 'I. Questionnaire "Diabetes test"'. The report lists the same four questions as the software interface with their answers: 'yes', 'no', 'yes', and 'no'. The total evaluation is 25%.

The screenshot shows a 'Print report' dialog box. It has a 'Choose printer' dropdown menu set to 'HP LaserJet 4000 Series PCL6'. There are 'Options' checked for 'Background' and 'Analysis'. Buttons for 'Print', 'Print to file', 'Preview', and 'Cancel' are visible. The 'Copies' field is set to 1.

Report

The questionnaire with the client specific answers can be printed as report.
